20	<p>The 2008 financial crisis was one of the most severe economic downturns since the Great Depression, triggered by the collapse of major financial institutions due to exposure to risky mortgage-backed securities and derivatives. The crisis not only led to the failure of major financial institutions but also caused significant economic turmoil across the globe, resulting in widespread job losses, bankruptcies, and a prolonged recession.</p> <ul style="list-style-type: none">a) Analyze the causes: Examine the role of financial instruments such as mortgagebacked securities (MBS) and collateralized debt obligations (CDOs) in the 2008 financial crisis. Discuss how these instruments contributed to the systemic risk in the financial system.b) Evaluate the impact: Assess the impact of the financial crisis on global financial markets. How did it affect investor confidence and the functioning of financial arkets worldwide?c) Lessons learned: Based on the lessons from the 2008 financial crisis, suggest measures that financial institutions and regulators can implement to prevent a similar crisis in the future.
